### / WORK EXPERIENCE

#### >> Android Developer

FoxAgle Web Solutions | 2017 to 2018

- Created custom mobile applications using native technologies.
- Collaborated with multidisciplinary teams to layout, design, and unfold new technology features.
- Played a major role in layout modifications to improve functionality.

#### >> Full-Stack Developer

Tech Integrity Services | 2019

- Managed milestones from initial steps through final delivery.
- Reviewed code, debugged problems, and corrected issues.
- Integrated AWS and did server clustering ( MySQL and MongoDB ) to handle APIs with more power and flexibility.
- Consulted with engineering team members to determine system loads and develop improvement plans.

#### >> Full-Stack Developer

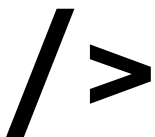

Freelancing | 2017 to 2019

- Worked closely with Project Managers and other developers to define parameters and plan detailed specifications with clear project deliverables and timelines to meet strict deadlines.
- Designed, developed, and implemented software applications for website based on analyzed requirements and understanding of industry technical standards.
- Researched, tested, and implemented various client feature requests to deliver internal content management systems and content delivery applications.

#### >> Software Developer

Om Infotech | 2018 and counting

- Maintained and upgraded products to deliver smooth-running systems.
- Reviewed projects for compliance with specifications and quality standards.
- Contributed to deployments by testing, debugging, and resolving issues for optimal results.
- Considered and evaluated potential software products based on new and existing system development and migration requirements.

## / EDUCATION

### >> Computer Engineering

A. V. Parekh Technical Institute | 2014 to 2017

- Created "StudyMate" Android Application as last year's project.
- The main aim of this project was to avail all the information a student needs while pursuing his/her diploma including last-year-papers, time-tables, results, and much more.
- It was developed using Java ( Android ), Google Firebase, and Git.

## / PROJECTS WORKED IN

### >> The Classy Home

E-Commerce Website | theclassyhome.com

- Developed and handling backend systems for managing stocks for products available in the online store.
- Automatic read and updation for the stock was build using C# as it comes out the best for Multi-Threading.

### >> Kumar Hair Art

Online Salon Appointment Booking System | kumarhairart.com

- Created frontend and backed totally using PHP.
- Integrated PayUMoney Payment method, and Firebase Auth.

### >> Shmira Public Safety

Call Management System | cwspsmira.org

- Allows us to take and manage calls assigned to members.
- Background location, Socket, and Firebase notifications are all integrated into Mobile App based on Flutter.

### >> Nursery Kids Learning Game

Kids Fruits, Shapes, Colors, etc identifying mobile game

- Kids need to identify the right color, fruit, or what asked which then gives them a better learning experience with fun and ease.

Note: there are few more projects  
but can't mention them all...

## / CERTIFICATIONS

- Programming Foundations: Algorithms - LinkedIn
- Node.js - LinkedIn
- Python - LinkedIn

## / HOBBIES

Reading Books | Writing | Watching movies | Coding |  
Solving bugs
